生產規格 STANDARD SPECIFICATIONS

材質 Material: SUS430 SUS304 SUS316 SUS201

厚度 Thickness: 0.5mm~3.0mm

最大寬度 Maximum Width: 1219mm

最大長度 Maximum Length: 5000mm

說明 Remark:

- 1、訂購時實際產品與本冊色板顏色會略有差異，請以實際產品為準。
The color of actual product may vary a little from the sample's. Please take actual product as standard.
- 2、如有特殊產品，您可隨時與我們聯繫，以獲得有關產品的進一步建議和指導。
For special products, you can always get in touch with us for further advice and guidance about the product.

抗指紋納米表面處理 ANTI-FINGERPRINTS

- 1、**好保養：**解決不銹鋼板容易沾指紋且不易保護的難題。
 - 2、**不易變色：**解決不銹鋼板在大自然環境下與空氣接觸所產生氧化變色的問題。
 - 3、**增加表面硬度：**一般不銹鋼的表面鉛筆硬度約2H~3H，經抗指紋處理後，表面硬度增加3倍，達到至少8H硬度。
 - 4、**防腐等級：**一般304不銹鋼在鹽霧測試中可試驗約400小時，經抗指紋處理後可有效延長不銹鋼板的使用壽命。
 - 5、**附著力強：**通過“百格實驗”100%的附著力測試，板材抗指紋處理後可折可彎，物理性能與一般的不銹鋼板一樣。
1. **Easy of Maintenance:** solves the problems of fingerprints and cleaning on the Ti coated stainless steel.
 2. **Low Discoloration:** Solve the problem of Ti coated stainless steel oxidation and discoloration caused by exposure to the air.
 3. **Increase Surface Hardness:** regular stainless steel is rated 2H-3H by Pencil Hardness Tester. After the AFP treatment, the surface hardness is tripled to reach at least 8H hardness.
 4. **Anti-corrosion Rating:** regular 304 stainless steel is capable of resisting approximately 400 hours of Salt Spray Test. After the AFP treatment, the lifespan can be extended effectively.
 5. **Adhesion Test:** passed 100% Cross-cut Test. After the AFP treatment, the material can be bent or folded, and still retains the same physical properties of regular Ti coated stainless steel.

使用及保養須知 USE AND MAINTENANCE GUIDELINES

- 1、使用柔軟棉布直接沾清水清潔表面，清潔後需將水擦乾。
 - 2、不得使用任何酸性、鹼性溶液或溶劑等擦拭表面。
 - 3、不得使用含有砂質物品打磨或擦拭表面。
 - 4、請在交貨90天內撕除PVC保護膜，否則膠膜會殘留在鋼板上。
1. Using soft cotton cloth directly or with tap water to clean the surface, then dry the surface.
 2. Do not use acidic solvent, alkaline solvent or even thinner to clean the surface.
 3. Do not use the sandpaper and things tough like this to clean the surface.
 4. Do not let the PVC protective layer stay on the stainless steel surface for more than 90 days from the date of delivery in order to avoid leaving the remains of the adhesive glue on the stainless steel surface.
